

AGGREGATE & MATERIAL GUIDE

Quality Materials for Your Excavation & Landscaping Project

PROFESSIONAL GRADE MATERIALS FOR:

- Residential & Commercial Excavation
- Landscaping Projects
- Driveway & Road Construction
- Drainage Solutions
- Foundation Work
- Decorative Landscaping

MATERIAL SPECIFICATIONS

3/8" Crushed Stone

Angular crushed limestone aggregate, ideal for creating stable surfaces with excellent compaction properties.

Common Uses:

- Driveways & parking areas
- Pathways & walkways
- Drainage applications
- Base layer material

5/8" Fractured

Premium fractured aggregate stone with superior binding and compaction characteristics.

Common Uses:

- Driveway construction
- Road base material
- Compaction projects
- Heavy-duty surfaces

3/4" Drain Rock

Clean washed drain rock designed for optimal water flow and filtration in drainage systems.

Common Uses:

- French drain systems
- Foundation drainage
- Septic system fields
- Retaining wall backfill

1" Fractured

Large fractured stone providing excellent drainage and decorative appeal for various applications.

Common Uses:

- Drainage solutions
- Decorative rock features
- Erosion control
- Landscaping accents

MATERIAL SPECIFICATIONS

Crusher Fines

Finely crushed stone that compacts exceptionally well, creating a stable and durable base.

Common Uses:

- Pathway base layer
- Paver installation base
- Compaction underlayer
- Shed & structure pads

Fill Sand

General purpose fill sand perfect for grading, backfilling, and leveling applications.

Common Uses:

- Backfill material
- Grading & leveling
- General fill work
- Underground pipe bedding

Mason Sand

Fine-grade masonry sand with consistent particle size, ideal for mortar and precision work.

Common Uses:

- Mortar mixing
- Concrete applications
- Paver joint filling
- Masonry projects

Concrete Sand

Washed concrete-grade sand meeting specifications for structural concrete and construction.

Common Uses:

- Concrete mixing
- Mortar applications
- Construction projects
- Foundation work

MATERIAL SPECIFICATIONS

Golf Course Sand

Premium fine sand with superior drainage properties, perfect for specialized applications.

Common Uses:

- Bunker sand
- Top dressing lawns
- Athletic field leveling
- Premium landscaping

3/8" Limestone

Decorative limestone chips providing natural beauty and functionality for landscaping projects.

Common Uses:

- Decorative landscaping
- Pathway surfacing
- Ground cover
- Garden bed topping

1" Wash Gravel

Clean washed gravel combining drainage efficiency with attractive decorative appearance.

Common Uses:

- Drainage systems
- Decorative features
- Walkway material
- Water feature accents

Class 5

Crushed aggregate blend with controlled gradation, excellent for roads and heavy-duty applications.

Common Uses:

- Road base construction
- Driveway foundations
- Parking lot base
- Heavy traffic areas

MATERIAL SPECIFICATIONS

Class 6 Roadbase

Premium engineered road base material meeting stringent specifications for structural applications.

Common Uses:

- Road construction
- Heavy-duty base layer
- Commercial driveways
- Municipal projects

1-1/2" Fractured

Large fractured aggregate ideal for drainage and erosion control in demanding conditions.

Common Uses:

- Major drainage projects
- Erosion prevention
- Rip rap applications
- Shoreline protection

1-3/4" Washed

Large washed stone offering both functional drainage and striking visual appeal.

Common Uses:

- Decorative landscapes
- Drainage systems
- Landscaping features
- Water management

Decorative Rock

Colored decorative stone adding visual interest and low-maintenance beauty to any landscape.

Common Uses:

- Landscaping design
- Garden bed accents
- Decorative borders
- Xeriscape applications
